

ALO NANO ALO 1

BETTER LIVE COMMUNICATION WITH LISTENERS

Telephone hybrid ALO is a fully electronic and have active circuits that not require the use of transformers in all versions of the product (1, 2 and 3 lines). Biquad Broadcast has implemented the ECO OFF, an intelligent echo cancellation system that reduce feedback more than 50dB.

Balanced inputs and audio outputs that provide better performance in the audible LISTENER x RADIO / STUDIO communication with sound cleaner and more defined, noise-free and metallic sounds.

The equipment does not require power to operate because they are powered directly by the electrical current from the telephone line itself.

The product has standard dimensions (H x W) and allows perfect fit in your office equipment type rack 19 'except the miniature version because due to its reduced size and weight and ease of installation allow it to be used also for external transmissions in units mobile, using a conventional telephone line to this.

ALO 2 ALO 3

The ideal interface telephone hybrid for your station is ALO. With the ALO interface, your listeners will have a true voice on the radio. Avoid distortion and noise in the audio while

maintaining high quality standard in communication with the station.

Canceling feedback and tinny sound.
